BLS

Vital English offers a range of online ESL courses which are designed for self-directed study; under BLS the online courses can be integrated into the in-class lessons. The teacher can decide whether to use the BLS courses as extra material for the lessons or to base the entire lesson on the teacher resources.

Vital English courses cover the full range from beginner to advanced level. When students purchase a course they will be provided with the student resources and the teacher will have access to all the necessary teacher resources.

To the right is an outline of all courses offered by Vital English, categorised by level, and an administration guide outlining skills covered in the courses.

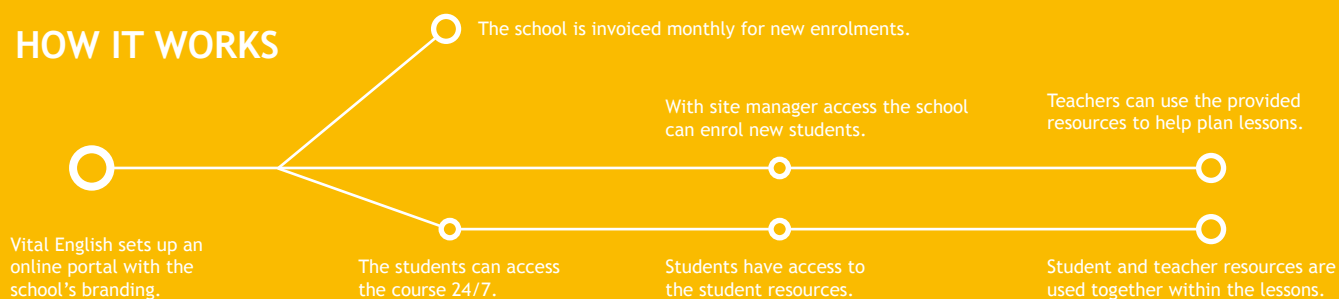

Who it's for:

Students who attend the classes and want to receive help from teachers for the online courses.

HOW IT WORKS

Vital English sets up an online portal with the school's branding.

The students can access the course 24/7.

Students have access to the student resources.

Student and teacher resources are used together within the lessons.
