

Pre-Arrival Learning

Connect with students BEFORE they arrive at your language school

Students often have an extended waiting period between when they have made their decision to study abroad and when they actually arrive to begin classes.

With the Pre-Arrival Learning (PAL), accepted students are given access to an online assessment tool and corresponding English course via a website branded for your school. An additional customised welcome tour helps the students build a relationship with your school and teachers and even familiarises them with the city and country.

Who it's for:

Students who are already enrolled in your school but have not yet arrived, PAL helps them prepare for their time in an English speaking school.

PAL includes:

- An individually branded website portal that clips seamlessly onto your existing website
- A placement test
- Access to a short Vital English General English course that corresponds with the placement test results
- Administration reports on student details, placement test level and course progress
- Automated registration emails sent to students

The benefits of PAL are:

- Providing an extended relationship with students - adding value to their overall experience
- Preparing students for English immersion after having studied English online for 1 - 3 months
- Providing valuable planning information through access to placement test results
- Access to important pre-arrival information such as visa activation at the airport, and details about the school, as well as student life in your city through the online orientation video

HOW IT WORKS
